Revil Ransomware-as-a-Service (RaaS) Model

REvil Core Operators

Alternative Jabber accounts:

Orange: Bitcoin, FunnyCrab

Unkn: 8800553535, Crab

Suslik: Eddie Bravo

Morgot: Rcode, Quake3

REvil Key Success Factors

- Dedicated comms platform vs. Email negotiations
- Leak site to publish stolen data
- Stable Malware and Decryptors
- Increase of available affiliate spots strict selection
- Outsourcing or partnering with facilitating services (Malware obfuscation, Exploit Kits, Customer service Money laundering etc)
- Good administration of infections.

Accounting is Hard, but Affiliate Numbers Help...

Trellix developed a custom Config extraction tool, for internal use and LE incident response.

Ransomware Accounting

File Name		Description
pk		Public key of the attacker in Base64
pid		Affiliate number
sub		Sub-account or campaign id
dbg		Debug option
fast		Option to encrypt the first 1 megabyte of each target file or all files
wipe		Option to wipe specific files in the field 'wfld'
	fld	Folders whitelist
wht	fls	File whitelist
	ext	List of targeted extensions
wfid		List of targeted folders
prc		List of processes to kill
dmn		List of C2 domains
net		Option to specify the connexion to C2
nbody		Ransom not in base64
nname		Strings of malware name
exp		Enable exploit CVE-2018-8453
img		Wallpaper ransom note in base64

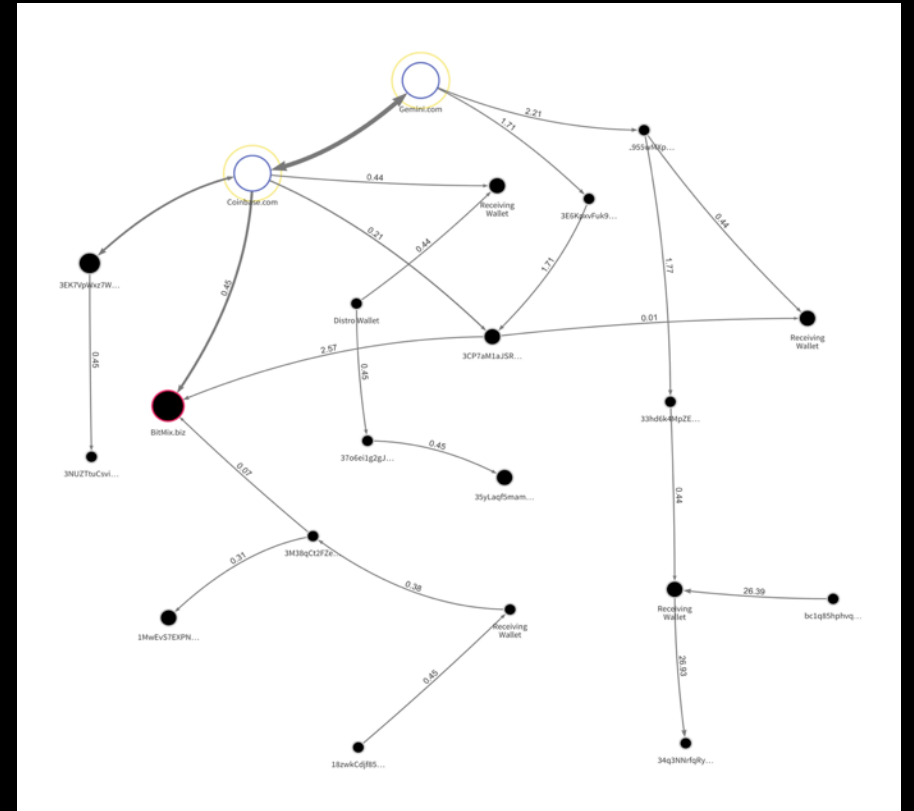

But... Stay Humble

The downfall of REvil

Kaseya: More than 1,500 downstream businesses impacted by ransomware attack

Attack Roles & Responsibilities

“The Meeting”

QTOX Meeting – 2 Days Before Attack

Unprecedented high-level coordination meeting – “they never made a chat like that that before”

UNKN
(Team Leader)

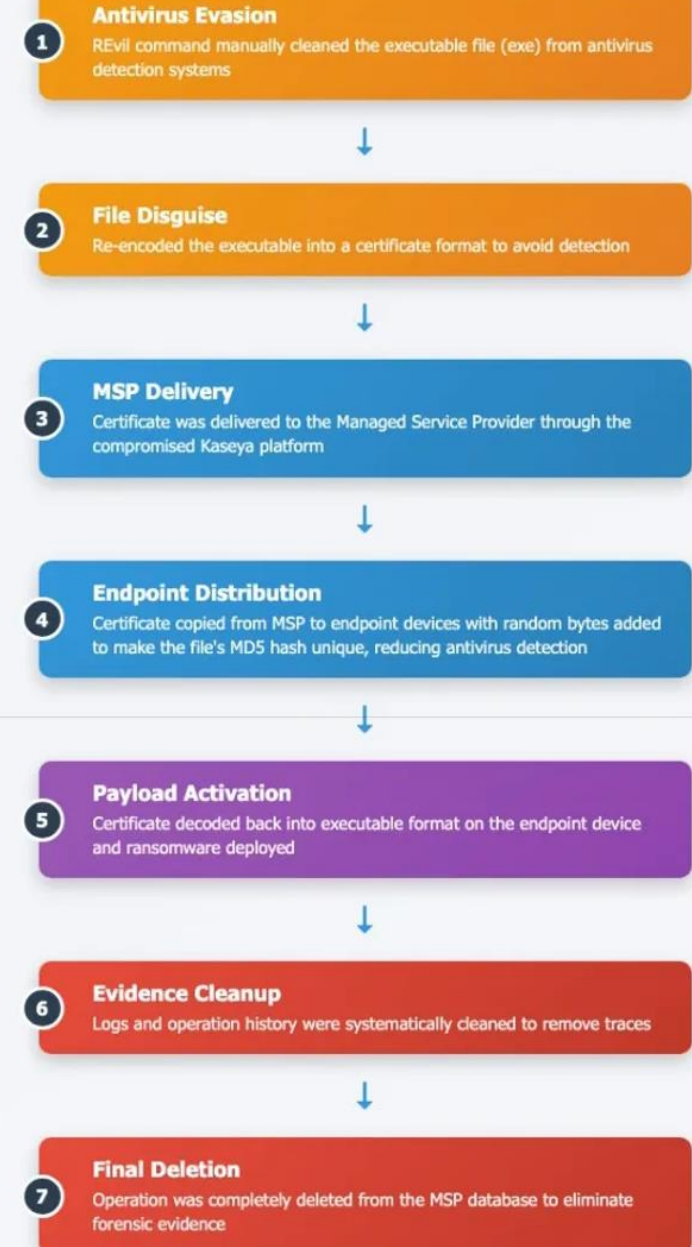

"Trump"
(Head of Support)

"O_neday"
(Coder)

"1_zeroday"
(Exploit Provider)

"Rabotnik"
(Vasinskyi)

Division of Labor: REvil provides clean manual build
→ Vasinskyi prepares attack → "Old friends" execute

The Hand-off

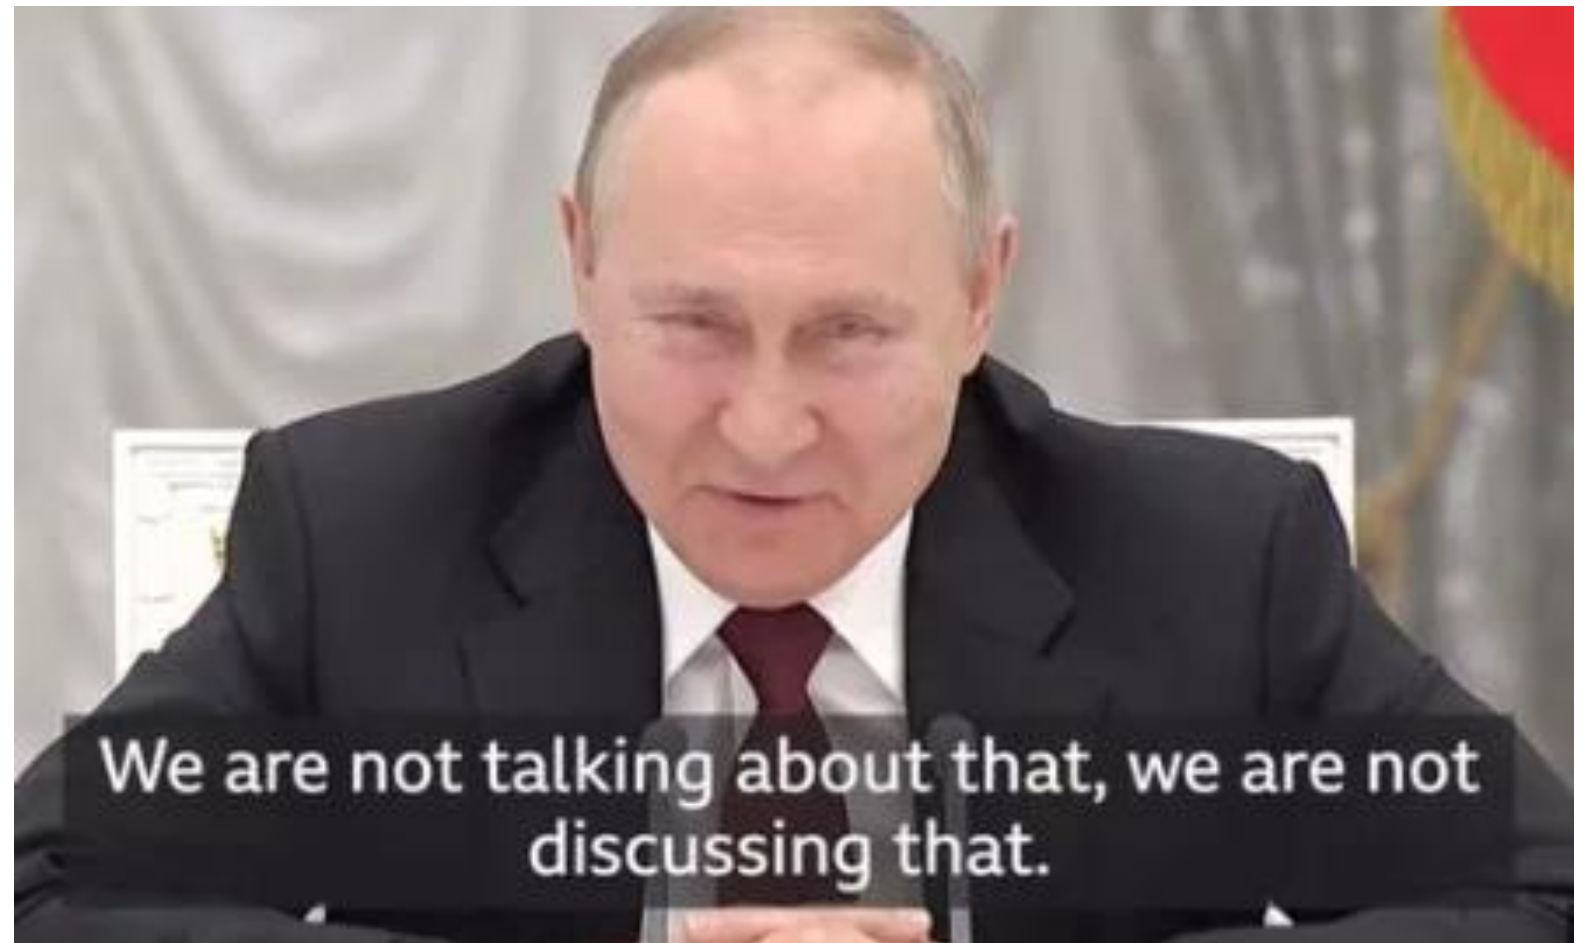

“Yes, the REvil team had partners who were associated with (Russian) government authorities. “

“I wrote to my "old friends"— here are the instructions, log in here, run the command, or find someone who will run it. I'm not going to do it”

Attack Motivation

Motive: Disruption, crippling downstream systems, collecting intelligence, and gaining access to critical infrastructure

Visinkyi's Silence

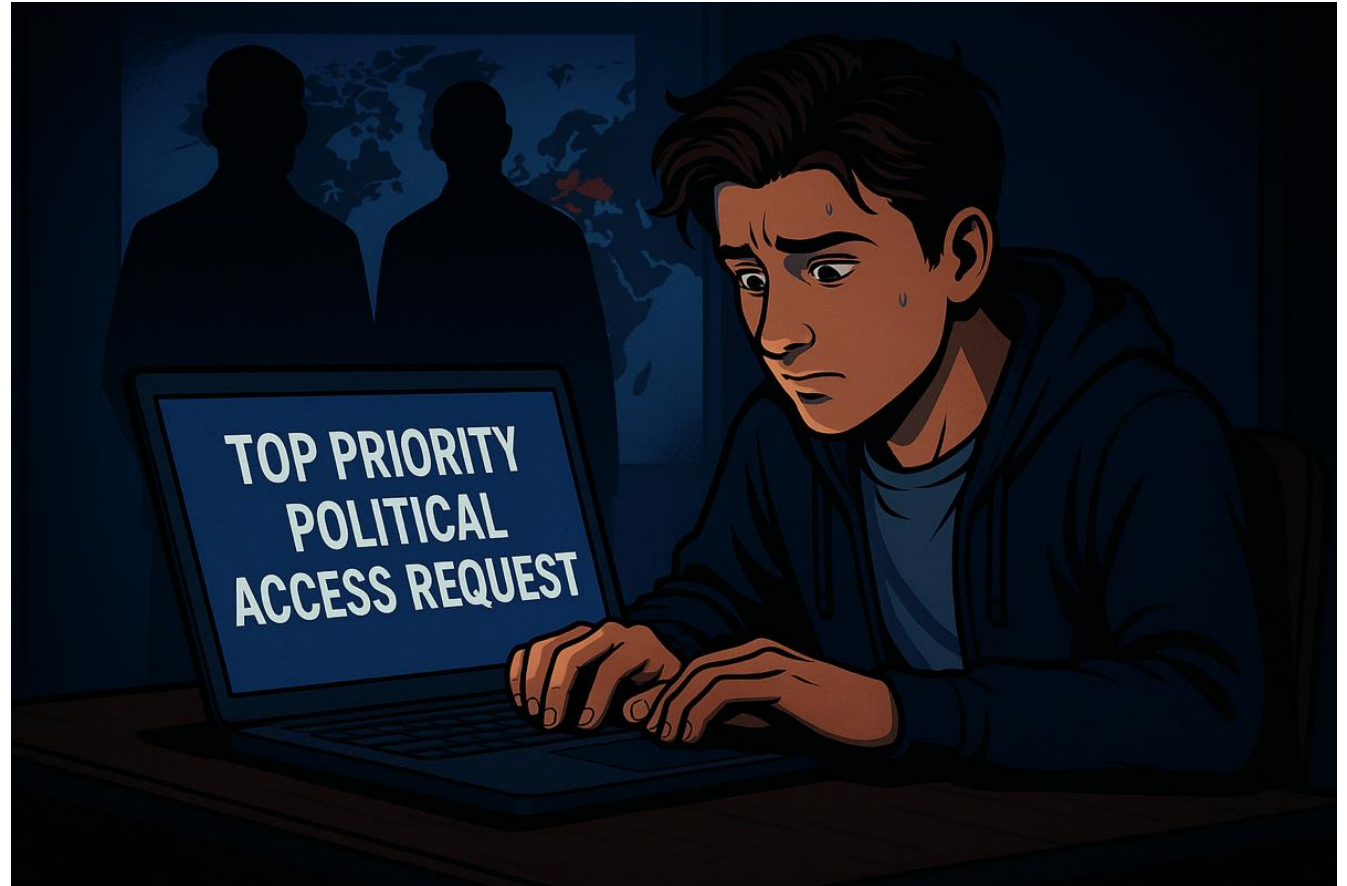

The Russian Connection

Working for Russian Intelligence

"Before REvil... I had gotten to know people with ties to government authorities. During my work with the ransomware group, those connections deepened."

"I got requests from intelligence agencies (usually before elections), though I only realized this after the job was done."

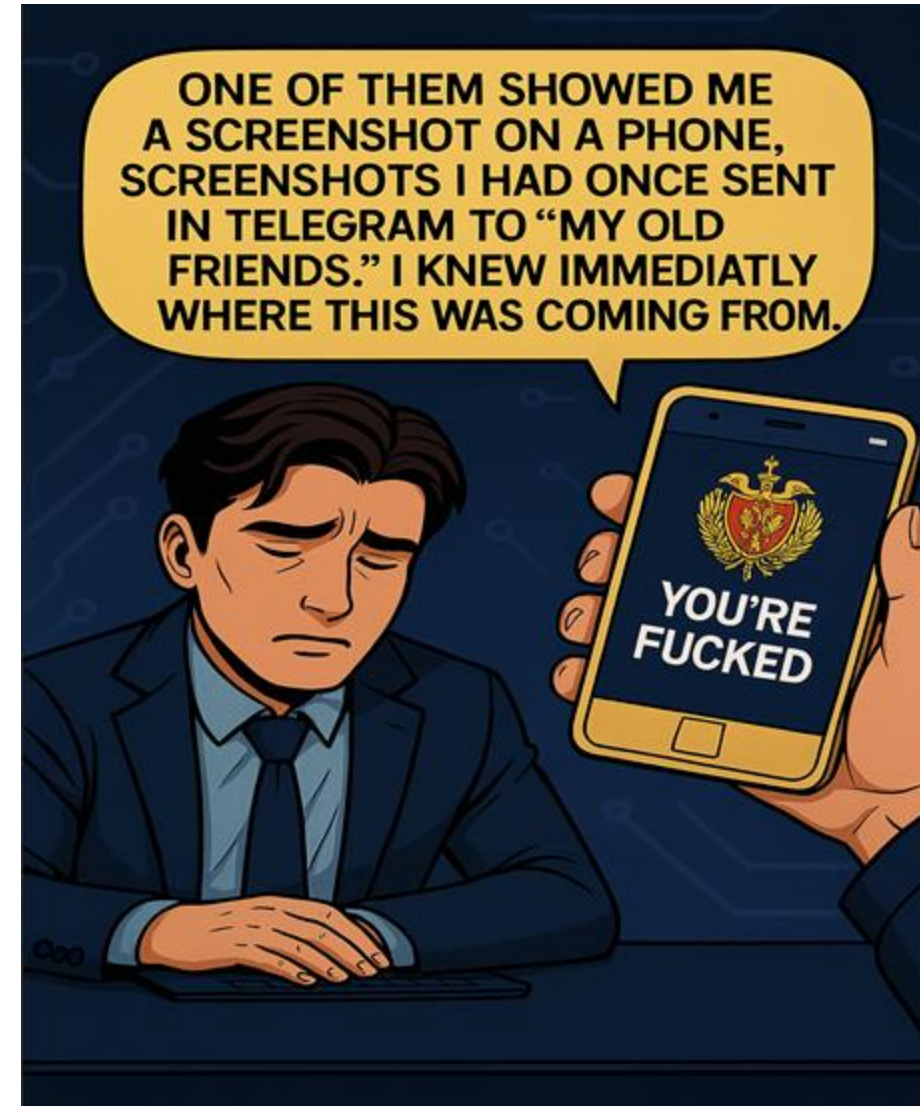

The Job You Can't Quit

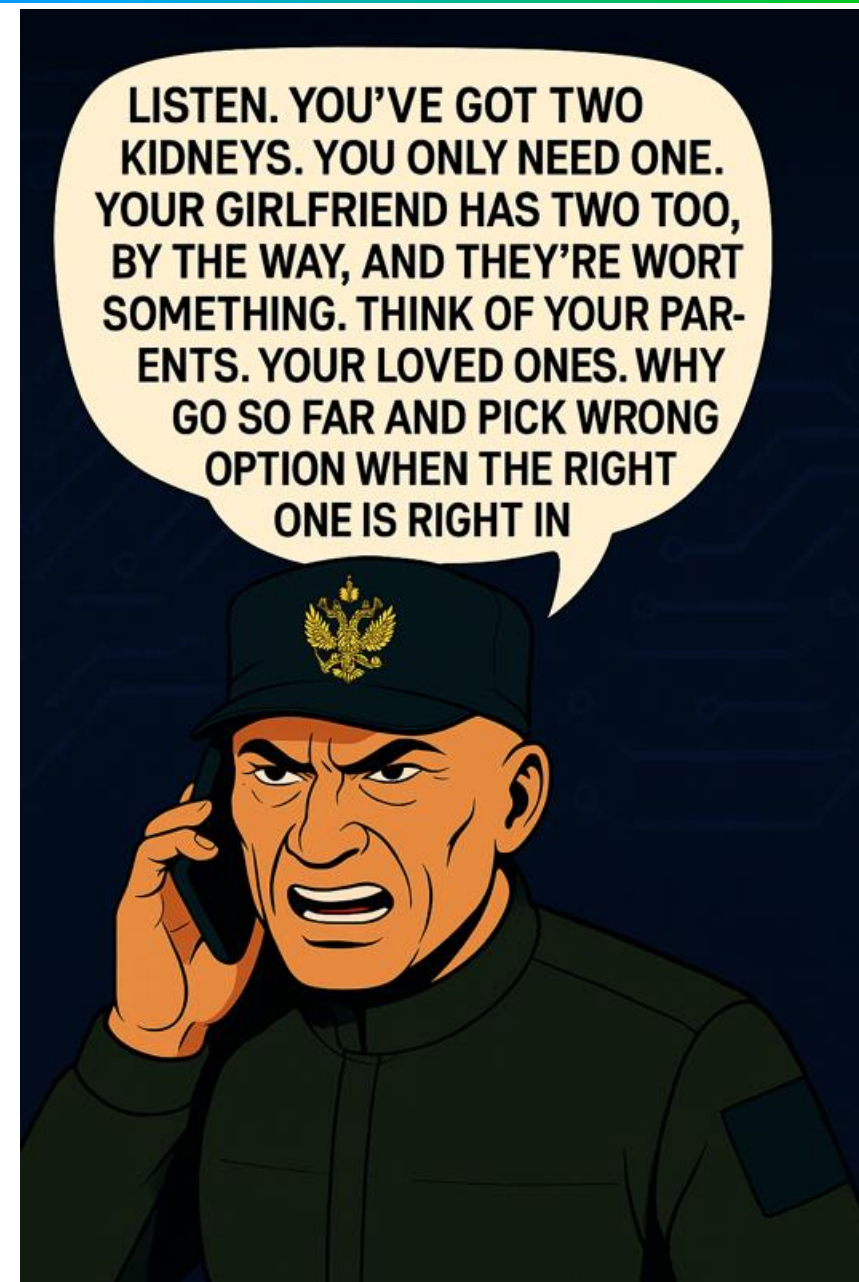

I seemed to be getting back on my feet. The school year was about to start, and I had no intention of returning to REvil, after all. I still had the money I hadn't spent.

Detained and Questioned in Ukraine

Warning Email

2 days before the attack

WHY DIDN'T HE TALK

Arrest & Extradition

The Trophy & The Ghost

Vasinski's arrest and conviction was a big win for the DoJ

But there is still more work to do

**Are they even
looking for REvil
leadership?
Appears not.**

HAVE YOU SEEN THIS MAN?!

MISSING

UNKWN

Last Seen: July 7, 2021

just days before the REvil ransomware empire
he commanded abruptly vanished from the
internet following the Kaseya supply-chain
attack.

UNKWN was only ever online during specific time zones, either UTC-6 or UTC+8. (If it's -6, it's likely Latin America; if +8, it could be Russia or Asia.) He also frequently took long-haul flights of about 6-8 hours. After his disappearance, a theory emerged. Trying to figure out what happened, such as flight dates, approximate departure and arrival times, I gathered information over the course of several months to try to match it with a real identity.

– Vasinskyi

The Vanishing Act

Before the attack,
UNKN recommended
he contact KOPIbTO.
For the right price,
KOPIbTO could make
someone disappear.
New identity.
New documents.

A clean exit.

Why Disappear?

UNKN didn't just disappear; HE HAD TO. The \$70 million ransom demand, posted publicly by REvil after the Kaseya attack, may have gone too far. Based on everything Vasinskyi told me, it clashed with the deeper purpose of the operation. This wasn't supposed to be about extortion. It was about disruption: crippling downstream systems, collecting intelligence, and gaining access to critical infrastructure. Putting a price tag on that risked undermining all of it.

**People like this
shouldn't get to
disappear into the dark
without consequence.**

The Silence After the Storm – What Comes Next

REvil should not be forgotten. Criminals don't disappear, they evolve

Law enforcement momentum changed priorities: Initial global push didn't evolve into lasting pressure.

Ransomware is evolving underground: Smaller, splintered crews now operate quietly, drawing from the same playbook.

Without consequences, the model persists: REvil's legacy lives on—not as a name, but as a method.

The real story didn't end—it just stopped being told.

Q&A - Let's Talk About It
